SAESHA RUTLEDGE

FULL-STACK ENGINEER • REACT / NODE.JS / TYPESCRIPT • AI-NATIVE DEVELOPMENT
Atlanta, GA (Remote) | (206) 450-2278 | saesha.rutledge.dev@gmail.com | linkedin.com/in/saesha-rutledge | srutledge.me

SUMMARY

Full-stack engineer with 6+ years shipping production software that real customers use daily, including a statewide health registry and macys.com. Owns features end to end, from discovery with stakeholders through launch and iteration, and builds daily with Claude Code and GitHub Copilot while keeping a high bar for correctness and maintainability. Strong in Node.js, Express, TypeScript, PostgreSQL, and AWS, with React, Redux, and Vite on the front end.

CORE COMPETENCIES

AI-Native Development Claude Code • GitHub Copilot • Model Context Protocol • Agentic coding workflows

Frontend React • Redux • TypeScript • JavaScript • Vite • HTML / CSS • EJS / Handlebars

Backend & Data Node.js / Express • REST APIs • PostgreSQL • MSSQL • Sequelize ORM • Python • AWS • GCP • Kubernetes • Terraform

Engineering Practice Architecture & tradeoffs • Data modeling • Third-party integrations • Test-driven development (Jest) • Feature flags • Root-cause analysis

EXPERIENCE

Solutions Architect & Software Engineer · VisualVault — May 2023 – Present

- **End-to-End Ownership –** Own a Washington State Department of Health registry from discovery through an on-schedule launch and ongoing improvements; it serves ~30,000 patients and providers and 300+ retailers.
- **AI-Native Development –** Build daily with Claude Code and GitHub Copilot to design, implement, and review production code while keeping human judgment on architecture and correctness; share AI-assisted workflows with the team.
- **Full-Stack Engineering –** Build Node.js, Express, and TypeScript services with Sequelize-based SQL persistence, and design the REST APIs, permissions model, and UI workflows built on them.
- **Product Partnership –** Reconstructed the agency's undocumented process through twice-weekly stakeholder sessions, turning it into business rules, workflows, and user stories approved before build.
- **Integrations & Data –** Architected the Fiserv payments integration, replacing manual fee collection with electronic payment, and defined validation rules to migrate never-validated legacy records.
- **Technical Leadership –** Lead technical direction for 8 developers and 5 QA engineers, mentoring through code review and surfacing risks early.

Software Engineer, Browse & Search · Macy's Technology — Mar 2022 – May 2023

- **Customer-Facing Features at Scale –** Shipped user-facing browse and search features on macys.com and bloomingdales.com (~70 million combined monthly visits) in JavaScript, HTML, and CSS on a Node.js microservice architecture.
- **Release Safety –** Used feature flags to de-risk production releases and improved reliability through test-driven development in Jest, debugging, and root-cause analysis.

Software Engineer · ProCom Consulting — Mar 2021 – Mar 2022

- **Payments Ownership –** Lead developer for payments and refunds on the State of Nebraska licensure system; built from vague, undocumented requirements and mapped downstream impacts across connected services.
- **Integration & Documentation –** Designed and engineered the PayPal Payflow integration with the LANCE enterprise platform and authored the payments architecture documentation the team used after handoff.

Software Engineer · Salepoint LLC — Apr 2020 – Mar 2021

- **Legacy Modernization –** Migrated legacy Oracle Forms supply chain logic for Department of Defense AAFES stores to Oracle APEX, documenting business rules for PL/SQL and validating data with Python scripts.
- **Security Clearance –** Held Public Trust clearance for the duration of the federal engagement.

EDUCATION

Certificate, Full Stack Software Engineering · DigitalCrafts | **CSPO & CSM** · Scrum Alliance (expired)

Ph.D., Musicology and Ethnomusicology · University of Kentucky
GPA 4.0. Published peer-reviewed research and presented internationally; taught university-level courses.

B.M., Music Performance, magna cum laude · Boise State University
